

PEUGEOT **BOXER**

PEUGEOT

PROFESSIONAL IN EVERY WAY

Much more than a simple means of transport, the Peugeot Boxer range offers vehicles specially designed for your business and for those who will drive them.

Because no two businesses are the same, the Boxer range includes numerous models available in different heights and lengths, and offers a choice of three HDi engines.

You can therefore be sure of finding the Boxer that meets your every requirement. Equipped with practical functions such as the loading sill, among the lowest on the market, and a very usable interior space, it adapts perfectly to all professional activities. All this with an innovative design which gives your business a dynamic and modern image every time you take to the road.

A RANGE FOR ALL REQUIREMENTS

The Boxer offers a choice of body types:

- Panel vans and Window Vans
- Chassis Cabs, Crew Cabs and Floor Cabs to serve as a base for conversions.

The Boxer comes in two different ranges:

- The 300 range is composed of three GVWs*: the 330 (3.0 tonnes), the 333 (3.3 tonnes) and the 335 (3.5 tonnes).

- The 400 range is characterised by reinforced suspension and is available with two GVWs*: the 435 (3.5 tonnes) and the 440 (4.0 tonnes).

Lastly, the Boxer also gives you a choice of different lengths and heights, so you can find the Boxer that meets your requirements.

The Boxer is available in a range of different body types and GVWs*:

Panel van
Window van
Chassis Cab
Crew Cab
Floor Cab

300 Range	GVW
330	3.0 T
333	3.3 T
335	3.5 T

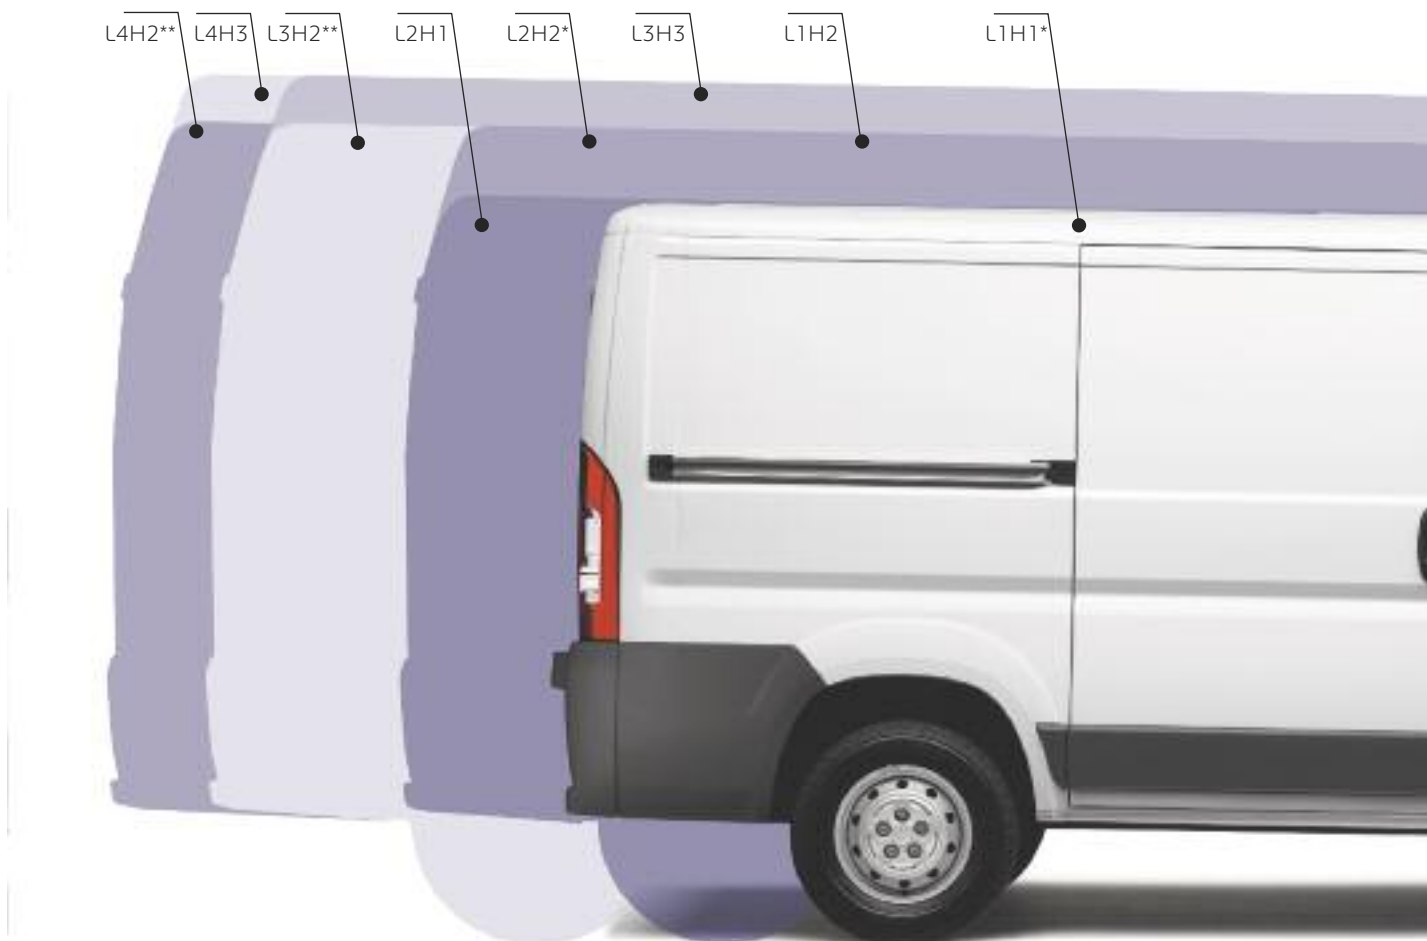

400 Range	GVW
435	3.5 T
440	4.0 T

YOUR MADE TO MEASURE BOXER

On vans, you can combine three heights (2.25 m – 2.52 m – 2.76 m) with four lengths (4.96 m – 5.41 m – 5.99 m – 6.36 m) and one additional length (L2S) available specifically on the Chassis Cab.

So, you can choose from up to 8 different body types (on panel vans), 7 interior volumes ranging from 8 m³ (L1H1 version) to 17 m³ (L4H3 version), with wide accesses making loading and unloading operations easy.

In addition there is a wide range of equipment and accessories allowing you to personalise your vehicle.

As a result, thanks to the different body types, different sizes and range of accessories available, there is a Boxer to suit your requirements.

Vans	Volume
L1H1	8,0 m ³
L1H2	9,5 m ³
L2H1	10,0 m ³
L2H2	11,5 m ³
L3H2	13,0 m ³
L3H3	15,0 m ³
L4H2	15,0 m ³
L4H3	17,0 m ³

SIMPLE AND EFFICIENT

The Boxer can meet and exceed your requirements. For example, in order to maximise load capacity, no space is wasted. The floor width between wheel arches is an optimal 1.42 m, among the best on the market, while the maximum interior width is 1.87 m.

To make life easier for you, the load sill is one of the lowest on the market: between 53.5 cm and 56.5 cm .

Lastly, the three different types of rear doors and sliding side doors (whose sizes vary according to body types) have been designed to facilitate loading and unloading operations.

The sill of the rear bumper is covered with a non-slip material, the hinged doors open to an angle of from 96° to 270° (optional), while a second sliding side door is available as an option.

* Except H3 height version.

Stowing rings

The floor has 12 or 14 stowing rings according to van version (straps not included).

12 volt socket*

The Boxer comes with a 12 V socket in the load area.

* Optional.

Courtesy lights

The load space has two courtesy lights (one only on length L1).

STABILITY TO COPE WITH ALL CONDITIONS

The entire range is equipped with a McPherson type wishbone front suspension with anti-roll bar. This technology offers true stability, giving the Boxer excellent road-holding characteristics while ensuring exceptional driveability.

Three other types of rear suspension are also available, either as standard or as an option:

- dual leaf reinforced metal suspension,
- single leaf suspension designed for comfort*,
- pneumatic suspension, which maintains the vehicle's ride height at a constant level regardless of the load and permits lowering of the loading sill.

Combined with 15 or 16 inch wheels (according to version), the Boxer suspension ensures comfort, safety and road holding regardless of the load transported or the number of passengers, within the limits of the vehicle's payload.

* Available according to version.

The 435 and 440 Range

This is fitted with reinforced suspension as standard which, thanks to a higher maximum load capacity per axle, allows uniformity both in terms of use and road holding. Being front wheel drive, the Boxer has excellent road holding characteristics, whilst also allowing a lower load sill at the rear.

EVERYDAY STRESS RELIEF

The Boxer is full of touches to make your life easier. Its cab is characterised by its comfort, light and practicality.

The passenger compartment, which can seat up to three occupants, has been designed to ensure that each person has enough space in which to feel comfortable. The seats offer excellent support thanks to their multiple settings*, while acoustic

comfort has also been carefully considered to reduce driving noise.

The Boxer's large glazed surface area allows occupants to enjoy a wide field of vision and excellent interior brightness, which makes for a truly welcoming atmosphere. In addition, cab lighting is improved by a double courtesy light located in the centre of the roof.

Lastly, the fascia panel has multiple storage spaces.

* Optional.

Lumbar adjustment*

On the side of your seat back, a small handle lets you adjust the lumbar support of your seat.

* Optional.

Overhead storage compartment*

Above your head, you have direct access to a 22 litre overhead storage unit.

* Standard or optional according to version.

Desk panel*

Very useful when you have something to write down, the desk panel serves as a mini-office.

* Not available with front passenger air bag.

THERE TO HELP WHEN YOU NEED IT

The Boxer comes with numerous systems to help you while you are at the wheel.

They include:

- automatic activation of lights*, as soon as the light level falls.
- automatic windscreen wipers*, which start as soon as the first drops of rain start to fall,

- programmable overspeed alarm**, which emits an audible signal if the programmed speed is exceeded.

* Optional.

** According to version.

Dual glass door mirrors

The dual glass mirrors make driving and manoeuvring easier. The upper section offers a very wide field of rear vision, while the lower section provides an excellent view of the lower part of the sides of your vehicle.

Rear video camera*

To make manoeuvres even safer, you can equip your Boxer with a rear video camera. Incorporated in the third brake light, it transmits images of the rear of your Boxer to an LCD screen located in the overhead storage compartment as soon as reverse gear is engaged.

* Optional.

Audible rear parking assistance*

Activated when reverse gear is engaged, this system warns you of the presence of an object or a person thanks to ultrasonic sensors installed in the lower rear panel. The presence of an obstacle is indicated by an acoustic signal which increases in frequency as the object gets nearer.

*Optional.

Electronic tachograph

Vehicles with a GVW of 4.0 tonnes are fitted as standard, in accordance with legislation, with an electronic tachograph and a speed governor limited to 55 mph (90 km/h).

PEUGEOT AND THE ENVIRONMENT

Protecting the environment and preserving the future of the planet are the greatest challenges we face today. For many years, Peugeot has introduced innovations to lower the consumption of its vehicles and reduce particle emissions but also to significantly reduce emissions of CO₂. So, the technology of the Boxer's various HDi engines offers both low fuel consumption and a reasonable level of emissions of CO₂.

HDi technology

A source of performance and economy, the Common Rail injection system is featured on every Boxer HDi engine. By injecting fuel at high pressure directly into the combustion chamber, this system reduces fuel consumption and emissions and provides extra power.

FAP

The Particle Emission Filter (FAP) technology

reduces emissions of pollutant particles to an unmeasurable limit, without reducing power or performance.

PERFORMS AS WELL AS YOU DO

2.2 l HDi 100 bhp

This four cylinder engine with cast-iron engine block, aluminium cylinder head, 16 valves and dual overhead camshaft is equipped with a turbo. This gives it excellent liveliness, combined with superb economy – two considerable advantages in urban traffic.

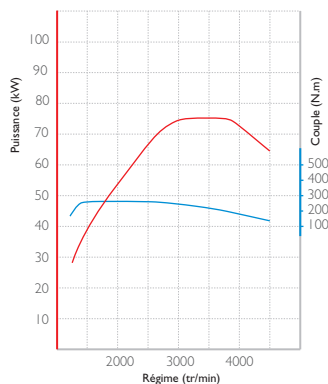

2.2 l HDi 120 bhp

Compared to the 100 bhp version, the 2.2 l HDi 120 bhp adopts a double flywheel (DVA), a piston cooling mode and special engine map. Combined with the power developed by its 120bhp, it performs well in town and on the open road for longer journeys.

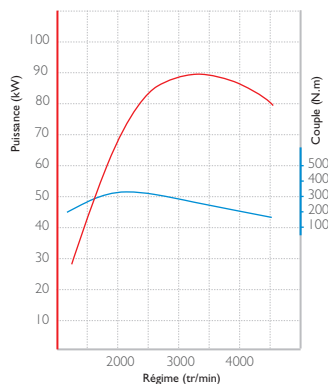

3.0 l HDi 157 bhp*

This second-generation Common Rail injection system is capable of regulating the pressure from 450 to 1800 bar according to demand. Combined with its 157 bhp and its torque of 400 Nm - exceptional for the category – this technology gives you all the performance you need for long road journeys.

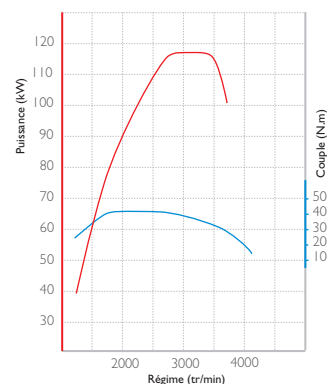

*Euro 5: versions available with 435 (3.5 T) and 440 (4.0 T).

Maximum power: 70 kW (100 bhp) at 2900 rpm
Maximum torque: 250 Nm at 1500 rpm

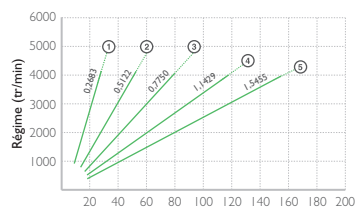

Maximum power: 88 kW (120 bhp) at 3500 rpm
Maximum torque: 320 Nm at 2000 rpm

Maximum power: 115.5 kW (157 bhp) at 3600 rpm
Maximum torque: 400 Nm at 1700 rpm

INTELLIGENCE THAT PROTECTS

Being safe in your vehicle is the least you can expect. That's why the Boxer incorporates a series of innovations designed to protect you and your passengers as effectively as possible in the event of an accident.

ANTICIPATE

To retain optimal balance in difficult situations, the Boxer is fitted with the following safety equipment:

- Anti-lock braking system (ABS)
- Emergency Braking Assistance (EBA)

- Traction Control (ASR)*
- Electronic Brake Force Distribution
- ESP* (Electronic Stability Programme)
- * Optional.

Disc brakes

Available as standard with four disc brakes, the Boxer is equipped with a high-performance braking system for optimal efficiency, endurance and reliability

Fog lamps*

To improve your visibility, the Boxer can be equipped as an option with fog lamps integrated in the bottom of the lower front panel.

* Optional.

PROTECT

Air bags

To protect its occupants in the event of impact, the Boxer makes no compromise:

- 1 driver's air bag and 1 front passenger's air bag*
- 2 side air bags**
- 2 curtain air bags**

Fuel supply safety

In the event of impact, the fuel supply automatically disconnects to limit the risk of fire.

* Optional.

** Only available with the individual passenger seat and "Achille" trim.

Driver's fasten seat belt indicator

The driver's seat is equipped as standard with a fasten seat belt indicator.

Safety auto-reverse on driver's electric window

The driver's one-touch electric window is equipped with a safety auto-reverse function which is actuated the moment the window detects an obstacle.

Reinforced structure

Several features of the Boxer's structure contribute to its high level of safety:

- a reinforced structure with crumple zone at the front which absorbs energy released in the event of impact,
- a rigid steel structure forming a block to protect the occupants, reinforced front doors which contribute to the rigidity of the vehicle,
- the dimensions of the front axles, optimised so that a part of the energy is transmitted under the body in the event of frontal collision,
- Limited movement of the pedal bracket and steering column to protect the driver.

ALERT

Open door locator

This system detects any door left open, including in the load area, and displays a warning lamp on the instrument panel and also on the multifunction screen.

EXTRA SECURITY

The Boxer lays great emphasis on protecting people and goods. For this purpose, it comes with multiple anti-theft devices conforming to Thatcham standard, reducing insurance premiums.

Transponder electronic immobiliser system

The Boxer is equipped with a latest-generation transponder electronic immobiliser system: when the ignition is switched on, a code is transmitted to the ECU which then gives the engine authorisation to start.

Automatic locking of doors while driving

Depending on its equipment, the Boxer's doors can lock automatically at speeds in excess of 12 mph (20 km/h). In the event of impact, they unlock automatically.

Deadlocking of front and rear doors

Thanks to this anti-intrusion device, it is impossible to open a door when a window is broken.

1.

2.

Exterior alarm and anti-lift alarm*

The exterior alarm system detects and signals any attempted break-in that involves opening the doors or the bonnet. This system can be supplemented by an optional anti-lift alarm, which goes off if your vehicle is lifted for loading onto a truck.

* Optional.

1. Central locking and independent locking

The Boxer stands out by having two independent central locking zones: the cab and the load space. So, a control located on the centre console locks all of the vehicle's doors, while another control, located on the door trim pad locks the load area only. Lastly, the remote control key locks and unlocks the doors of the passenger compartment independently of the doors of the load area.

2. Identification marking

To make it easier to find and identify your vehicle if it is stolen, its chassis number is engraved at the bottom of the windscreen.

COLOURS AND TRIMS

The Boxer offers a wide choice of solid or metallic colours and according to the levels of finish, choose the trim that your prefer.

SOLID COLOURS

Bianca White

Dragoon Blue

Clipper Blue

Horizon Yellow

Onyx Black*

Volcano Red

METALLIC COLOURS

(Optional)

Azurro Blue

Aluminium

Iron Grey

Graphite Grey*

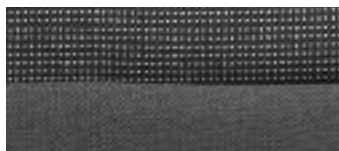

Golden White

Ruby Red

* Available at a later date.

TRIMS

The Boxer's seats are covered with an elegant and functional "Transcodage" cloth.

They can optionally be covered with "Pierce" PVC.

www.peugeot.co.uk

To find out more about the Boxer, configure it to suit your requirements and obtain full information about the colours and engines available, the maintenance, the options and the technical specifications, please visit the website.

PEUGEOT AND YOU

When you choose Peugeot, you have the reassurance of knowing that your vehicle has been designed and manufactured to give you years of worry-free motoring. What's more, as a Peugeot owner, you can rely on a comprehensive range of customer care services from your Dealer. So you can be sure that you're talking to a specialist who'll listen to you, understand your problems and respond efficiently – someone who also has the expertise to maintain your Peugeot correctly, using trained technicians, Peugeot Diagnostic Equipment and Peugeot Original Equipment Parts.

PEUGEOT WARRANTIES

As well as the 2 year unlimited mileage manufacturer's Warranty, all vehicles first registered in the UK and purchased from a UK Peugeot Dealer come with a free, optional additional year of Warranty through the Peugeot UK Dealer network. The mileage limit on this additional Warranty is 60,000 miles (100,000 miles for Boxer vans excluding Motorhomes and other converted vehicles) from first registration. At the end of the 3 year Warranty period (or after 60,000 miles) you have the option to purchase a Peugeot Platinum Extended Warranty. Our cars also come with a 12 Year Anti-Perforation and 3 Year Paint Warranty (6 and 2 years on vans). For full terms and conditions on all of these, please contact your Peugeot Dealer.

PEUGEOT ASSISTANCE

All new Peugeots come with 12 months Peugeot Assistance – our breakdown assistance service. This covers all

incidents involving vehicle-based faults for you and anyone else driving your car with your permission. It is available 24/7, 365 days a year.

Peugeot Assistance includes European cover, homestart, roadside assistance, vehicle recovery and a free replacement car or hotel accommodation if required. It can be extended for a further 12 months, or 24 months, and to protect you against non-vehicle faults (such as punctures) at specially discounted rates, by calling 0870 752 7050.

PEUGEOT SERVICE CARE

Peugeot vehicles benefit from extended service intervals of up to 20,000 miles or 2 years (12,000 miles for 1.6 HDi diesel ; 24,000 miles or 2 years on Boxer, 10,000 miles or 1 year on 107). Please refer to the maintenance book for details of the service intervals for specific models and vehicles operating in arduous conditions. Finance – Let the Specialists help. Peugeot Financial Services offer a number of

flexible finance plans that make owning a new Peugeot easy. We specialise in car finance and can provide you with choice, convenience and flexibility directly through your local dealer. Written quotations are available on request from: Peugeot Financial Services, Quadrant House, Princess Way, Redhill, RH1 1QA. Over 18's only, a guarantee may be required.

PEUGEOT INSURANCE

Peugeot Insurance has been designed specifically for Peugeots and offers tailored cover at a competitive price. If you are unfortunate enough to have an accident, one of our Peugeot Approved Accident Repair Centres will repair your car, using only Peugeot original parts. Plus we'll give you a courtesy car while yours is being repaired (subject to availability when you use an approved repairer). When the time comes to renew your insurance cover, why not try

Peugeot Insurance?

You can call Peugeot Insurance for a quote on 0870 0240 206. Lines open 8am-8pm weekdays, 9am- 5pm Saturdays. Max call charge from a BT landline is 8p per minute. Calls from other networks may vary. Calls may be recorded. Peugeot Insurance is underwritten by UK Insurance Limited. Conditions apply.

PEUGEOT AND THE ENVIRONMENT

Our website has full details on all Peugeot products, and offers available in the UK . You'll also find information about our environmental and recycling policies.

PEUGEOT ACCESSORIES

Peugeot Accessories are designed specifically for each model which means there are no compromises on fit or function. In addition they are rigorously tested to our own high standards giving you complete confidence and peace of mind.

The information contained in this brochure is based on the data and images available at the time of printing. Some feature combinations may not be available in the UK . Also, some photography may feature vehicles which are left hand drive. As part of our policy of continuous specification improvement, Peugeot reserve the right to modify technical equipment, the options available, and colours at any time. For full specification ask your Peugeot Dealer, or click on www.peugeot.co.uk. Please note that print and photographic processes used in the creation of this brochure may alter the depth and tone of the colours shown. This brochure is not a contractual document or offer of sale. The details in this brochure cannot be reproduced without the expressed authorisation of Peugeot.
