An instrument with information helpful for your driving, always in real time. Not only! It is all perfectly integrated with **Uconnect™** and **Uconnect™ 7"**, which let you also consult information on the Media functions, by telephone and connectivity, using the same screen.

Depending on the version of your **New 500**, the TFT display is available with two different basic graphics and it also changes appearance with the driving mode set: **Normal**, **Sport** or **Eco**. REAR PARK ASSIST

AUDIO MEDIA

HANDS-FREE TELEPHONE

It is not hard to remain faithful to the original spirit, with increasingly more current style and performance. Not if you know how to

ALWAYS LOOK BEYOND.

WITH BI-XENON

In addition to the new line of front and rear optical groups developed in collaboration with Magneti Marelli, the **New 500** also delivers optional Xenon headlights, which expand your field of vision, increasing the light flux and diffusion. The results are incredible: your night vision increases by 200% compared to normal halogen headlights, giving you at least one extra second to spot obstacles and 28 metres advantage in terms of braking distance when travelling at 50 km/h. This means less stress, less eye fatigue and even notable energy saving: Xenon lights in fact consume less and last longer, almost three times longer than halogen lights.

ADVANTAGES

INCREASE SAFETY DUE TO:
INCREASED LIGHT FLUX

HALOGEN HEADLIGHTS

XENON HEADLIGHTS

WITH DUALOGIC™

Created jointly by Fiat and Magneti Marelli, Dualogic™ the new generation robotised transmission allows you to choose the preferred driving style of the moment: relaxed and comfortable in automatic mode, ecofriendly and more attentive to fuel consumption with the ECO option, or agile and sporty using the sequential shifting with paddles on the steering wheel. When you want to use the manual gearbox, get ready to meet the bolder and sporty Dualogic™: the faster the engine revs, the faster and more aggressive gear changes become.
